

## CEDAR Systems Automated Pull and Cut System

**Eastman®**  
Cross Cut

**Pull Speed Adjustment**

**Grip Cylinders Rail**

### Pull-Cut Functions and Benefits

- \* Pulls directly from your fabric source.
- \* Only 1 person per 1 or 2 units is required to operate the machine.
- \* Can be mounted over your table or behind your machine.
- \* Easy adjustability for lengths to be cut.
- \* Stack directly onto your cart (carts can be custom designed and built to fit your specific need).
- \* Off-the-shelf replacement parts.
- \* Proven Eastman Cross-Cut System is incorporated for years of service.
- \* No programming is required.
- \* Linear guides keep the panel straight and even.
- \* Easy to clean and maintain.
- \* Can be Custom Designed to accommodate your cutting requirements.

**Manufactured with pride in the U.S.A.**

from globally sourced components.
