

VAVW CONTOUR SEAMING MACHINE

Model: 3536

Contour Seamer

- * Once panels are loaded and contour guide is engaged, all stitching, chain-cutting and stacking is 100% automatic.
- * Sewn work is stacked directly & automatically onto individually modified bundle carts; no heavy lifting is required of the operator.
- * Seam quality is controlled by a contour guide, trailing mouse clamp and variable top & bottom feed controls.
- * Trailing mouse clamp holds the panels in place, providing greater operator mobility and efficiency.
- * By freeing the operators hands from panels faster than conventional contour seamers, the operator may load panels faster and easier.
- * We utilize the highest quality cutting edge technologies including:
 - Pegasus™ EXT-3200 Sewing Head.
 - Efka™ Programmable DC drive system.
- * Unique roll-away table allows easy access to the sewing head for maintenance.
- * Full production may be achieved within 2-3 weeks.
- * Mounted on hard rubber, locking casters for mobility and stability.
 - ALL PRODUCTS INCLUDE UNCONDITIONAL 60 DAY WARRANTY.
 - FOR MORE INFORMATION, CONTACT ROBIN COLLIER OR RANDY COLLIER.

Manufactured with pride in the U.S.A.
